

Project Demo Planning

Date	06-07-2026
Team ID	
Project Name	Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Explain the project objective and problem statement	2	Voleti Pavan Teja
2	User Interface	Show input fields (Nitrogen, Phosphorus, Potassium, Temperature, Humidity, pH, Rainfall)	2	Voleti Pavan Teja
3	Crop Prediction	Enter sample values and predict the recommended crop	3	Voleti Pavan Teja
4	Model Explanation	Explain the trained Logistic Regression model and the prediction process	2	Voleti Pavan Teja
5	Testing	Test with different input values and verify results	2	Voleti Pavan Teja
6	Conclusion	Summarize the project and answer questions	1	Voleti Pavan Teja

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for crop recommendation and the project objectives.
2	Solution Overview	Explain the Flask application, the trained machine learning model, and the user inputs.
3	Live Feature Demonstration	Enter sample values and demonstrate the crop prediction result.
4	Q&A Session	Answer questions and conclude the project demonstration.
